Technology can be friendly.

3.5" TOUCH SCREEN CUSTOMIZABLE INTERFACE

SGL introduces its latest gem to the market: Trophy. A compact machine, elegant designed and with sinuous lines, Trophy comes in two models: Plumbed-In and one Pour-Over (with an internal water tank). Trophy uses Capsules, and is compatible with RealCup™ and K-Cup®*. The Trophy Plus version is enriched by combining with soluble products, giving the choice of a great variety of drinks. The product marks another stage in the technological evolution of SGL, with a 3.5" touch screen, which can be customised via USB.
