

# Introducing a highly flexible payment system

A stylish and modular electronic cash payment system, the Nespresso system provides you with a simple and convenient payment system for your employees and visitors. With multiple configuration options, it offers you flexibility and reliability and guarantees that you get the most enjoyment from your coffee machine.

## Automatic capsule dispenser

- Wall configuration
  - Table-top configuration
- Both possible with any PRO machine: Gemini generation or ES range

### One payment option:

- Payment card or key ring, which can be credited via a loading station

## Full Tower configuration

- Automatic capsule dispenser
- + Gemini|CS 200 PRO or Gemini|CS 220 PRO
- + base cabinet

### Two payment options:

- Payment card or key ring only, which can be credited via a loading station
- Payment card or key ring

Capsule dispenser

Card or key ring payment unit is integrated within the capsule dispenser

Machine

Base cabinet

# Streamlined cash management: choose the payment system that is best for you

## Reloadable payment cards or key rings

- Intuitive and easy to use
- Quick and convenient – no need to carry small change
- Credit balance and capsule prices available on display screen
- Coffee pricing defined by you
- The option to have different pricing for payment by card or key ring
- Subsidise coffee payment via credit card or capsule prices
- Provides a clear record of coffee consumption
- Uses radio frequency technology

### Choose an administration option to suit your needs:

- Card or key ring credited by user  
(Only with the Full Tower configuration)

- Card or key ring credited by an administrator within your company

Equipped with a loading station, the administrator you designate within your company credits cards and key rings, upon request. Users can choose from a range of credit values.
